

Myntra Faishion analysis Insights Through Excel

Presented by:Sai Govindacharya

Revolutionizing online fashion retail with curated collections, exclusive brands, and a seamless shopping experience for millions of customers.

ABOUT MYNTRA

Myntra is a leading Indian fashion e-commerce company, founded in 2007–08 as a platform for personalized gifts. Today, it has evolved into a one-stop destination for fashion and lifestyle needs. Headquartered in Bengaluru, Karnataka, Myntra offers a seamless and enjoyable shopping experience across 19,000+ pin codes in India. The platform features a vast collection of apparel, accessories, cosmetics, and footwear from over 500 renowned Indian and international brands, including Adidas, Nike, Puma, and more. With its customer-first approach, Myntra continues to revolutionize the online fashion shopping space in India.

A. DATA CLEANING AND PREPARATION

1. Check for duplicate values in your dataset and remove them.
2. Standardize the "DiscountOffer" column to a single format, ensuring all values are uniform.
3. Identify rows where both "DiscountPrice" and "DiscountOffer" are null and fill the "DiscountPrice" with the average discount price of the respective category.
4. Replace all null values in the "SizeOption" column with the text "Not Available."

1. Check for duplicate values in your dataset and remove them.

Select the data, go to the Data Tab and click
“Remove Duplicates”.

2. Standardize the "DiscountOffer" column to a single format, ensuring all values are uniform.

Use **"TEXT TO COLUMN"** with space delimiter to separate parts of the value (like "Rs.", "OFF" and "HURRY").

Use **Replace** Function to remove **"Rs."** and **"Hurry*"** from the text.

Use **IF**, **ISNUMBER**, and **ISBLANK** functions to clean the column and retain correct values only.

3. Identify rows where both "DiscountPrice" and "DiscountOffer" are null and fill the "DiscountPrice" with the average discount price of the respective category.

	Q	R	S	T	U
	Column3				
675	=IF(ISBLANK([@[DiscountedPrice (in Rs)]],[@[OriginalPrice (in Rs)]-[@Discount],[@[DiscountedPrice (in Rs)]]])				
632					
769	629				
401	893				
210	389.35				

By using formula given in the image, we get "DISCOUNT OFFER" but with some Errors.

To fix these Errors, use the formula mentioned in the image.

Q	R	S	T	U
Column3	Column4			
824	=IF(ISERROR([@Column3])," ",[@Column3])			
517	517			
629	629			
803	803			

After removing Errors there are some blank values. Use the mentioned formula to fill it with the average discount price of the category.

S	T	U	V	W	X
count	Column5				
675	=IF([@[Discount Amount]]=" ",AVERAGEIFS([Discount Amount],[Category],[@Category]),[@Discount Amount])				
632					
769	769.45				
401	401.45				
210	209.65				

4. Replace all null values in the "SizeOption" column with the text "Not Available."

Price (in Rs)	DiscountOffer	SizeOption	Ratings	Reviews	Co
1499	45% OFF		3.9	999	
1149	55% OFF		4	999	
1399	55% OFF		4.3	999	
1295	31% OFF		4.2	999	
599	35% OFF		4.2	999	
599	40% OFF		4.4	999	
1499	60% OFF		3.9	998	
1395	58% OFF		3.7	998	
1098			4.3	997	
2749			3.5	996	
2699	55% OFF		4.4	996	
699			4.1	996	
3399	70% OFF		4.2	996	
2499	50% OFF		4.3	996	
799	60% OFF		4	996	
1099	53% OFF		4.2	995	
1699	59% OFF		4.2	995	
3999			4.3	995	
2149	61% OFF		4.1	995	
999	75% OFF		4.3	995	
1298			4.4	994	
1599	55% OFF		3.8	993	
849			4.2	993	
1499	50% OFF		4.2	993	

Used **Filter** to locate all the null values. But
No Null Values are Found.

B. DATA ANALYSIS

1. Calculate the overall average original price for products with ratings greater than 4.
2. Count the number of products with a discount offer greater than 50% OFF.
3. Count the number of products available in size "M."
4. Create a new column to label the products as "High Discount" if the discount offer is greater than 50% OFF, otherwise label them as "Low Discount."

1. Calculate the overall average original price for products with ratings greater than 4.

	G	H	I	J	K	L
1	DiscountPrice (in Rs)	OriginalPrice (in Rs)	Discount offer	discounted amou	Category2	Category3
2	824	1499	45%	674.55	Bottom Wear	1351.207867
3	517	1149	55%	631.95	Bottom Wear	1351.207867
4	629	1399	55%	769.45	Topwear	1138.634061
5	893	1295	31%	401.45	Lingerie & Sleep Wear	811.9028417

To calculate overall average original price for Ratings above 4 using the formula displayed in the image

Average Original Price for products with ratings greater than 4

	1621.55	

2.Count the number of products with a discount offer greater than 50% OFF.

J2 : $\text{=IF}([\text{Discount offer}]>50\%, \text{"High Discount"}, \text{"Low Discount"})$

	H	I	J	K	L	M	N
	OriginalPrice (in Rs)	Discount offer	Column1	discounted amount	Category2	Categori	SizeOpti
1	1499	45%	Low Discount	674.55	Bottom Wear	1351.208	28, 30, 32, 34
2	1149	55%	High Discount	631.95	Bottom Wear	1351.208	S, M, L, XL
3	1399	55%	High Discount	769.45	Topwear	1138.634	38, 40, 42, 44
4	1295	31%	Low Discount	401.45	Lingerie & Slea	811.9028	S, M, L, XL, 2XL

Create a new column by labeling the offer as "HIGH DISCOUNT" for greater than 50% & "LOW DISCOUNT" for less than 50% using the "IF" Function.

C. DATA RETRIEVAL AND LOOKUP

1. Use VLOOKUP/XLOOKUP to find the product brand, price, and rating of the product with Product_id "11226634".
2. Find the "DiscountPrice" for the product with the Product ID "6744434" using the INDEX and MATCH functions.
3. Utilize nested xlookup to find any column's detail of a product with its product id.

1. Use VLOOKUP/XLOOKUP to find the product brand, price, and rating of the product with Product_id "11226634".

11226634					
NAME	PRICE	RATING			
=VLOOKUP(U6,Table1[#All],[Product_id]:[Reviews]},{2,7,14},FALSE)					
VLOOKUP(lookup_value, table_array, col_index_num, [range_lookup])					

11226634			
NAME	PRICE	RATING	
Maniac	1199	3.9	

Use "VLOOKUP" Function to find the BRAND, PRIZE AND RATING of product ID:- 11226634

2. Find the "DiscountPrice" for the product with the Product ID "6744434" using the INDEX and MATCH functions.

	6744434						
	=INDEX(Table1[DiscountPrice (in Rs)],MATCH(U8,Table1[Product_id],0))						

	6744434		
	599		

To find the discount prize for the product ID:-6744434 using the “INDEX” and “MATCH” Function

3.Utilize nested xlookup to find any column's detail of a product with it's product id

CONCLUSION & INSIGHTS

Effective data cleaning significantly improved the accuracy and reliability of the analysis, allowing deeper insights into Myntra's product range. The study revealed that a substantial portion of items carried discounts above 50%, reflecting deliberate pricing strategies aimed at attracting customers. Size "M" emerged as the most common option, suggesting strong consumer demand and inventory alignment. Advanced Excel tools such as VLOOKUP, XLOOKUP, and INDEX-MATCH supported detailed product-level exploration, uncovering hidden trends. Together, clean datasets and robust analytical techniques provided actionable guidance, enabling better decision-making, optimized inventory planning, and an enhanced shopping experience for Myntra's customers.

THANK YOU
